

ASAP UTV

Our new ASAP UTV “Ambulance” has arrived. This vehicle will be stored at the Henreitta base and utilized for standby events and patients with challenging accessibility such as paths, trails or during significant weather events. A trailer will be available to transport the vehicle over longer distances.

While the vehicle will not be a state certified Ambulance, the planned equipment setup allows for rapid access to patients and transport to an ambulance or treatment area.

The vehicle has more than adequate space for a gurney, supplies, a complete gearset and EMT or Paramedic.

The plan for initial and ongoing training for the vehicle will be released soon.
